Career Objective:

Looking to obtain a opportunity to expand and grow Web and Software Development skills

Professional Experience:

Vemma Nutrition Company

Web Developer - Aug. 2007 to Present

Worked with a Web Development team to create, build and maintain Vemma Nutrition Company websites, assisted and launched new product campaigns, along with creating deliverable email marketing HTML templates.

The Web Developer position required and consisted of creating fresh and new designs, extensive use of HTML and CSS and working with database management.

The Vemma Nutrition Company websites were built and designed to assist brand partners with accessible tools to develop, build and grow there business. Some of these tools consisted of personal websites for each brand partner, training materials such as pdf's, video and audio presentation and much more...

Direct Alliance - SonyStyle.com

Technical Assistance/ Product Support - Sept. 2003 to Aug. 2007

Assisted Customers with support for new purchases of Sony VAIO laptops and any technical questions that a customer may have had.

Also assisted and trained for the launch of AT&T and Sprint Wireless activation service that was provided and built into the newer additions of Sony VAIO notebook computers. It was a requirement to complete Windows Vista OS training for more backend assistance for corporations and goverment support for specific Sony contracted customers.

I was also tasked with creating HTML and PHP online forms for Customer Services Reps, create and build analytics for the sales team with database reports and microsoft excelsheets.
